Company Profile

PT Visi Arlion Internasional is a pioneering Indonesian manufacturer dedicated to eco-friendly solutions. Recognized for its commitment to sustainable development, we collaborate with prestigious institutions like Gadjah Mada University to consistently deliver high-quality, environmentally-responsible products. Our extensive product portfolio encompasses innovative applications of coconut byproducts, agricultural commodities, and renewable materials, making us a comprehensive solution for diverse markets.

Our Product:

From coconut waste derivatives to organic biomass materials, we transform nature's abundance into versatile, value-driven products:

- **Coconut Waste Products:** We manufacture cocopeat, cocofiber, cocohusk, bristle, coconut rope, coir geotextile, sun shade sails, coconut sheets, coir mats, growbags, and coco pots, alongside home living and fashion items crafted from coconut rope and coconut sheet.
- **Coconut Kernel Products:** Our coconut kernel offerings include copra, desiccated coconut, coconut oil, and virgin coconut oil (VCO), contributing to food and wellness industries globally.
- **Agricultural Waste Products for Livestock Feed:** Including copra meal, palm kernel meal, and cassava pulp (onggok), which are nutrient-rich byproducts supporting livestock nutrition.
- **Agricultural Waste Utilization:** Biomass products like palm kernel shells, wood pellets, rice husk pellets, and wood chips support renewable energy initiatives.
- **Agricultural and Plantation Resources:** Including rice husk and charcoal, pine bark, and organic fertilizers such as composted manure.
- **Land Reclamation & Soil Erosion Prevention:** We specialize in land reclamation services for post-mining sites, critical lands, and landslide-prone areas, contributing to ecosystem restoration and stability.
- **Agricultural Commodities:** Catering to global demands, we offer cloves, black pepper, cinnamon, cardamom, konjac, vanilla, and agarwood.

Each product reflects our dedication to creating value from waste, with applications across industries that promote sustainable practices and contribute positively to the environment.

Operation Facilities

PT Visi Arlion Internasional's reach is extensive, with marketing offices in Jakarta, Cirebon, Yogyakarta, Bali, and Perth, Australia. Our production facilities in Majalengka and Yogyakarta are complemented by partnerships with hundreds of local SMEs, ensuring the inclusion of Indonesia's rich human resources and knowledge in our production chain.

Market Reach, Client

We proudly serve both B2B clients—including companies in the Industrial Plantation Forest sector committed to sustainable timber and pulpwood production, promoting responsible forestry and eco-friendly resource management—as well as B2C consumers both domestically and internationally. Our retail products are now available at MR DIY and Kemchick, with our distribution network expanding continuously.

Global Presence

With a strong presence in over 90 countries, PT Visi Arlion Internasional is a global ambassador of sustainable Indonesian manufacturing, setting the benchmark for responsible production that meets both the environmental and commercial needs of the future.

Commitment to Innovation and Ethical Manufacturing

Focused on innovation, integrity, and environmental responsibility, PT Visi Arlion Internasional is redefining the standards of sustainable manufacturing. As we expand globally, our core values remain firmly rooted in ethical practices, circular economy principles, and the enduring belief in transforming waste into wealth.

A photograph of a coconut processing facility. In the foreground, a large pile of coconut husks and shells is visible. In the background, there is a wooden table with a metal rod and pulleys, a yellow plastic crate, a blue plastic crate, and a red plastic crate. A concrete wall and a blue pipe are also visible.

Coconut Derivatives

Gardening

We offer a variety of gardening essentials, including cocopeat, burnt husk, coco husk, coco bricks with different uses, as well as coco pots, cocomesh, and cocofiber. These products are perfect for supporting all your gardening needs, whether for planting or improving soil quality.

COCOPEAT BULK

Cocopeat with low EC and moisture content of 70-80%, weighing 20 kg per sack, is available for purchase.

COCOFIBER

Coconut fiber with a length of 8-30 cm and moisture content of 18-25% is available, with custom weight per plastic packaging.

COCOHUSK

Cocohusk with a custom size ranging from 1 cm to 5 cm, low EC, and moisture content of 18-25% is available.

RICE HUSK BIOCHAR

Rice husk biochar is a porous charcoal produced from burned rice husks, used to enhance soil fertility and sequester carbon.

RICE HUSK

Rice husk in granular form, not ash, is available with custom weight per plastic packaging. Perfect for cage bedding, animal feed mixture, fertiliser mixture, and planting medium.

COCO BRICK

Growing media made from coconut husk, shaped into blocks, specially formulated for specific plant varieties.

ALLTYPE

Special formula for all kinds of plants

COMPOSITION:
COCOPEAT

Cocopot Variant

Coconut husk fibers are pressed with measured heat and pressure into eco-friendly pot shapes. Shape: Round, Square, and Hexagonal

COCOPOT SMALL

- upper diameter = 12 cm
- bottom diameter 8 cm
- height = 11 cm

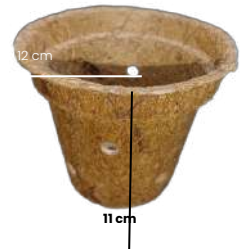

COCOPOT LARGE

- upper diameter = 18 cm
- bottom diameter = 12 cm
- height = 18,5 cm

COCOPOT MEDIUM

- upper diameter = 15 cm
- bottom diameter = 10 cm
- height = 14,5 cm

COCOPOT ORCHID

- upper diameter = 12 cm
- bottom diameter 8 cm
- height = 11 cm

Coir Variant

COCOPEAT BLOCK LOW EC

- Low EC
- Low EC (max 0,7 mS/cm, 1:3)
- Weight 4,5 - 5 Kg
- Expansion Volume is
- 60 - 70 L / block
- Moisture < 20%
- pH 5 - 7
- Dimention 30x30x12-15 cm
- 40ft HC can load 4400 block

COCOPEAT BLOCK HIGH EC

- High EC
- High EC (EC > 1 mS/cm, 1:3)
- Weight 4,5 - 5 Kg
- Expansion Volume is
- 60 - 70 L / block
- Moisture < 20%
- pH 5 - 7
- Dimention 30x30x12-15 cm
- 40ft HC can load 4400 blocks

GROW BAG

- Cocopeat mix with cocohusk
- EC max 0,7 ms/cm
- Moisture 18-20%
- PH 5-7
- Weight 800-850 grams
- Expansion 8-9 Liters/single bag
- 40ft HC can load 18.000 bags

COCOPEAT POLYBAG LOW EC

- Cocopeat Bulk Low EC in polybag packaging
- Weight per bag 27-30 kgs
- Moisture 30% - 50%
- pH 5 - 7
- Dimension 30x40x70 cm
- 40ft HC can load 750 polybag
- without pallet

COCOPEAT GROWBAG 2,5 KG

- Cocopeat mix with cocohusk
- EC max 0,7 ms/cm
- Moisture 18-20%
- PH 5-7
- Weight 2.5kg
- Growbag packaging all white
- Dimension 30x30x5 cm
- 40ft HC can load 9.600 bags

COCOPEAT GROWBAG 2-3 KG

- Cocopeat mix with cocohusk
- EC max 0,7 ms/cm
- Moisture 18-20%
- PH 5-7
- Weight 2-3 kgs
- Dimension 100x15x3 cm

COCO PERLITE

Coco perlite is a premium growing medium that combines the moisture-retaining qualities of coco peat with the aeration benefits of perlite. This balanced formula creates an optimal root environment, helping plants develop stronger, healthier systems.

PERLITE

Perlite is a lightweight, white, granular material made from superheated volcanic glass. Used as soil amendment and hydroponic growing medium known with its excellent aeration and drainage properties. Horticultural perlite is sterile, pH neutral, and non-toxic. Its naturally porous structure makes it good for plants by preventing soil compaction and allowing roots to breathe.

COCO SHEET

We accept to customs order, for latex, width and length

maximum width we can make is 2 m

maximum length we can make is 10 m

COCONUT ROPE

- Diameter 6-8mm (tolerance +- 2mm)
- PLength customs

COIR MAT

Coir mats are made from the tough, natural fibers extracted from coconut husks. This eco-friendly material is durable and resistant to moisture, rot, and mildew, making it versatile for various applications.

COCONUT FIBER

- Moisture 14-18%
- Length of fiber 8-25 cm
- weight 90-105 kg
- Dimention 40x70x100 cm

COIR MULCH MATS

we accept to customs order, for latex, shape, width and length

we can make in shape rectangle and circle

COCO BRISTLE

Coco bristle is a product made from coconut coir, forming long and fine fibers for various industrial and household uses.

COCOMESH

Coco mesh is a mat made from natural coconut fibers that prevents soil erosion from wind and water. This durable mesh protects soil and promotes vegetation growth, commonly used in landscaping by securing it over exposed soil or slopes with stakes or staples.

HYDROSEEDING

We also offer hydroseeding services that combine the use of nets, sheets, and coconut coir ropes to create effective and sustainable revegetation solutions. This service is designed to accelerate the growth of new plants and protect the soil from erosion.

CALOPOGONIUM MUCUNOIDES

Calopogonium mucunoides is a fast-growing, short-lived perennial legume. It is an excellent cover crop, known for its ability to suppress weeds, improve soil fertility by fixing nitrogen, and prevent erosion with its dense, sprawling vines.

PUERARIA JAVANICA

Pueraria javanica, or Tropical Kudzu, is a vigorous, perennial legume vine valued for its robust growth. It features large, broad trifoliate leaves and a strong, deep taproot that grants it excellent drought tolerance. This vine is known for producing a heavy biomass, forming a dense, smothering canopy that effectively suppresses weeds.

COCO MESH
PROJECT

Coconut Oil Products

We are dedicated to sustainability and purity, offering a range of high-quality coconut oils to meet different needs. Our modern production methods ensure freshness and the best standards. Coconut oil is rich in lauric acid, which helps boost the immune system, supports heart health by increasing good cholesterol, and enhances metabolism with its MCTs. It also works as a natural moisturizer, helping with dry skin and hair, and contains antioxidants that fight aging. Coconut oil is versatile—you can use it for cooking, in smoothies, as a skin moisturizer, or as a hair mask for healthy hair.

Extra Virgin Coconut Oil

Extra Virgin Coconut Oil is made from fresh, mature coconuts through a 100% cold-pressed method., ensuring that its structure remains unchanged and all natural nutrients are preserved.

Uses: Great for direct consumption, skincare, and haircare.

RB Coconut Oil

RB coconut oil is raw, unprocessed coconut oil, perfect for industrial uses.

Uses: Ideal for bulk cooking, baking, and food processing.

RBD Coconut Oil

RBD coconut oil is refined, bleached, and deodorized for a neutral flavor and extended shelf life.

Uses: Suitable for cooking, baking, and as a base for cosmetic products.

Crude Coconut Oil (CNO)

CNO is unrefined coconut oil extracted directly from the dried coconut meat (copra) through mechanical or chemical processes.

Uses: Soap, detergent, and chemical industry.

Derived from the Kernel

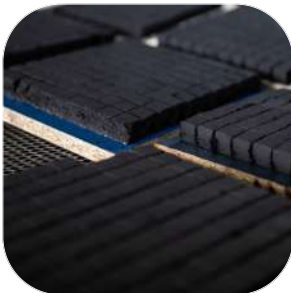

DESICCATED COCONUT

We also offer hydroseeding services that combine the use of nets, sheets, and coconut coir ropes to create effective and sustainable revegetation solutions. This service is designed to accelerate the growth of new plants and protect the soil from erosion.

Coconut Charcoal

COCONUT CHARCOAL

Coconut Shell Charcoal is a type of charcoal made from shells of coconuts. It is produced by heating coconut shells in a low-oxygen environment to remove moisture and volatile compounds, leaving behind the carbonized coconut shell. It is usually use for cooking, grilling, and others.

CHARCOAL BRIQUETTES

Coconut charcoal briquettes are type of charcoal made from coconut shells. It is known for their high heat output and long burn time. It is good for grilling, barbecuing, shisha or hookah smooking, and others.

Home Living and Sun Shade

Home Living Collections

At Arlion, we focus on creating beautiful and sustainable products from natural materials like coconut fiber and coconut shells. Our Home Living Collection features unique, eco-friendly items that bring a natural touch to your home. From stylish chairs and cozy cushions to elegant tableware, each piece is carefully crafted with a mix of traditional craftsmanship and modern design. Whether you want to add rustic charm to your space or find practical, sustainable solutions, our products offer a perfect balance of style and function.

FASHION PRODUCT

Leather Totebag

A craft from coconut coir and premium cow leather. With meticulous craftsmanship, this handbag showcases the rustic charm of the coir paired with the timeless elegance of leather, offering both functionality and a sustainable fashion statement.

Canvas Totebag

Introducing our unique tote bags, skillfully crafted from coconut coir fibers, a testament to sustainable fashion. These bags blend the rugged texture of coconut coir with the refined finish of canvas edging, ensuring durability while adding a touch of sophistication.

Shopping Bag

A harmonious blend of sustainability and style. Crafted primarily from the resilient fibers of coconut coir, this bag showcases an eco-friendly solution to everyday needs. The edges, lined with durable canvas fabric, not only add a touch of elegance but also reinforce the bag's strength.

Notebook Cover

Crafted from coconut coir—a testament to sustainable innovation and timeless design. Edged with durable canvas fabric and integrated button provides an anchor for attaching a strap, ensuring your notes remain secure and stylish.

Laptop Bag

A harmonious blend of Indonesia's abundant coconut coir and durable canvas, offering both protection and style for your device. Eco-friendly and crafted for longevity, this bag boasts a sleek magnetic closure, ensuring easy access while keeping your laptop secure.

Slippers

Artfully crafted to blend Indonesia's rich coconut heritage with modern design. The durable, breathable sole, derived from nature's own coconut coir, pairs seamlessly with the refined canvas edging, ensuring both comfort and style.

Coaster

Masterfully crafted from resilient coconut coir, a testament to sustainable luxury. These coasters aren't just functional; they're a work of art. Each piece is elegantly bordered with canvas fabric, adding a touch of sophistication and ensuring durability.

Keychain

Masterfully fashioned from authentic coconut coir and genuine cowhide. These keychains not only showcase a unique fusion of textures and materials but also echo a commitment to sustainable sourcing and timeless design.

Biomass

Biomass

We are committed to sustainability and eco-friendly energy solutions, offering a range of high-quality biomass products like wood pellets, palm shells, and more to meet various energy needs. Our modern production processes ensure high efficiency and adhere to the best environmental standards. Biomass is an excellent renewable energy source that helps reduce carbon emissions, supports cleaner energy alternatives, and promotes sustainable practices. It's a versatile option, whether used for power generation, heating, or industrial fuel. Biomass is also rich in calorific value, making it an efficient energy source for long-term use. By choosing biomass, you're not only reducing your carbon footprint but also supporting a greener, more sustainable future.

Wood Pellet

Wood pellets, made from compressed wood waste, are a renewable fuel option for heating and power generation. They produce fewer emissions and are carbon-neutral, commonly used in pellet stoves, boilers, and industrial applications. While affordable and widely available, their production and transport can have environmental impacts, and alternatives like solar or wind may be more sustainable in some cases.

Palm Shells

Palm shells, a byproduct of the palm oil industry, are a sustainable biomass fuel with high calorific value, ideal for electricity, heat, and steam generation. They are also used in activated carbon production for water and air purification and serve as a nutrient-rich soil amendment, improving moisture retention and soil structure.

Coffee Pellets

Coffee pellets, made from coffee grounds or coffee-related waste materials. They can serve as a fuel or agricultural substrates. It can be used as an alternative fuel in pellets stoves, biomass boilers, or other heating systems due to high energy.

Wood Chips

Wood chips are fuel made from chips or pieces of wood that have been processed. These wood chips are produced from the process of cutting or crushing wood. Wood chips are used as an environmentally friendly alternative energy source.

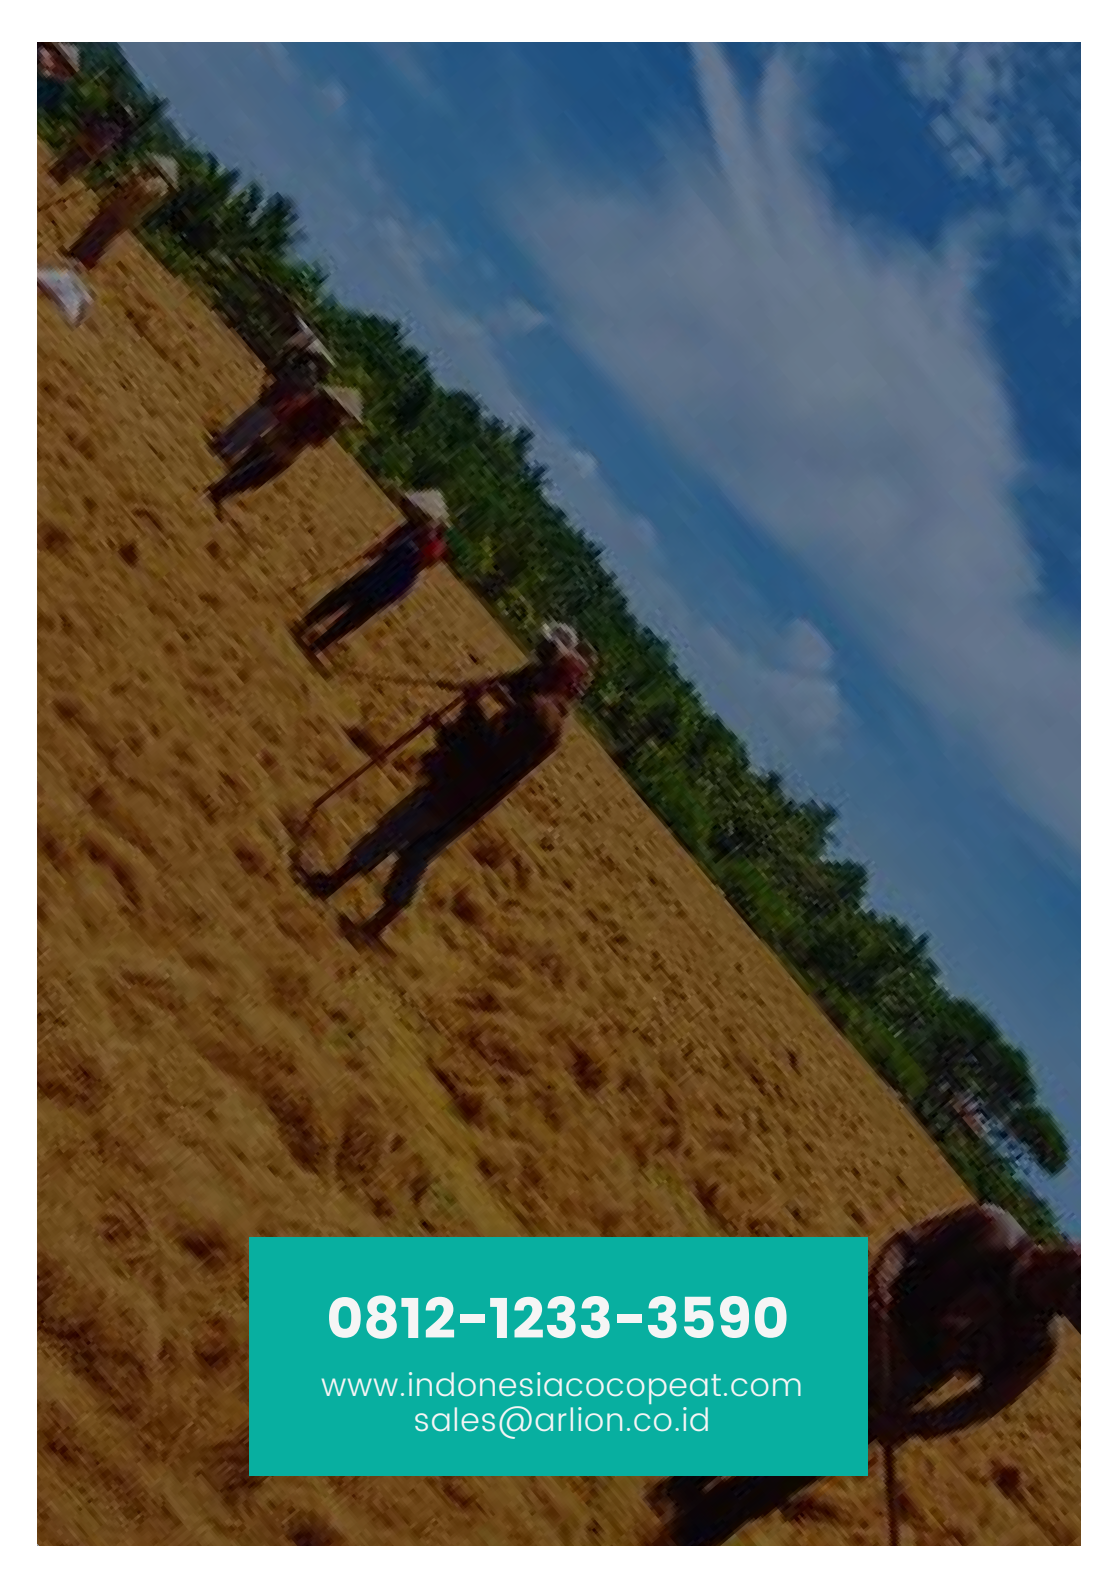

Rice Husk Pellets

Rice husk pellets are solid granules made from processed rice husk or grain husks. Rice husk pellets are produced through a processing process that involves drying and compressing the husk into a denser and equal solid form.
